...on the Draft On-Street Parking Management Strategy

A well planned and managed approach to parking can help make our towns and local communities better places to live, work and visit. The On-street Parking Management Strategy sets out our approach to managing parking on-street and seeks to support our sustainability objectives by ensuring streets are useable for pedestrians and cyclists and not dominated by cars.

The strategy provides practical advice on how we can consistently manage the most common issues that Central Bedfordshire Council faces with on-street parking.

This is a new document, and we think it is important for residents, businesses, and other interested parties to have the opportunity to have their say before it is finalised. Any feedback we receive will help us make sure our approach to managing on-street parking works effectively.

For further information, and to view and comment on the **On-street Parking Management Strategy** between **10am on 12 August and 10am on 26 September 2022**, please visit our website:
